

SRM AI HUB

100-Page Admissions & Student Information Research Dossier — 2026

1. Cover — SRM AI Hub Research Dossier 2026

Comprehensive admissions, student-information, hostel, scholarship, examination, curriculum and placement-research pack for a source-grounded SRM AI assistant.

Purpose: provide a large, structured evidence base that can be converted into RAG chunks and structured records. The dossier deliberately separates current 2026 material from older regulatory material.

Authority rule: official SRMIST sources are preferred for institutional facts; NIRF/AICTE material is used as regulatory or institutional evidence where appropriate.

Research / implementation note: Do not treat this dossier itself as an official SRM publication. Preserve the original source URL, year and page for every indexed fact.

2. How to Use This Dossier

Use the document as a research layer, not as a replacement for source PDFs. Each section identifies what the AI should learn, what metadata should be attached, and where the evidence comes from.

The final SRM AI Hub should have both semantic retrieval and structured lookup. Admissions prose, regulations and explanations belong in RAG; fees, dates, percentages, hostel totals and placement statistics should also be stored as structured records.

When two documents disagree, the AI should prefer the newer applicable document and expose the year/context rather than silently merging values.

- Keep academic year in every record.
- Keep campus and program in fee/hostel records.
- Keep regulation year in academic-rule records.
- Keep page/source URL in citations.

Primary sources

Admission portal: <https://admissions.srmist.edu.in/>

Annual report 2024-25: https://webstor.srmist.edu.in/web_assets/downloads/2026/ugc-annual-report-2024-25.pdf

3. Source Hierarchy

A robust hierarchy prevents hallucination. For current admission facts, use the current official SRMIST admission source first. For national institutional statistics, NIRF submissions are useful. For older policies, AICTE mandatory disclosure can provide historical context.

Third-party blogs should never override an official source. If a third-party source reports a number that the official source does not confirm, label it unverified rather than importing it.

Priority	Source type
1	Current SRMIST official PDF/page
2	Current SRMIST official regulation/circular
3	NIRF / government submission
4	Older SRMIST official document
5	Third-party source only for discovery; not authority

4. 2026 Snapshot

The 2026 source set contains SRMJEEE FAQs, syllabus and examination pattern, 2026 counselling material, 2026 international-admission material, 2026-27 hostel schedules, 2026 curriculum/regulation documents and the 2024-25 annual report.

This makes 2026 a strong anchor year for the AI Hub. However, not every category has a single 2026 PDF; some information remains program-specific or is published as a webpage.

Category	Current evidence located
SRMJEEE	2026 FAQ, syllabus, pattern, counselling manual
Hostel	2026-27 boys and girls schedules
Curriculum	2026 program-specific curriculum PDFs
International	2026 application material
Scholarships	2026 S&H; scholarship material plus 2025-26 international policy
Institutional statistics	NIRF 2026 and 2024-25 annual report

5. Admissions Portal

The official admissions portal is the operational entry point for applications. The AI should link users to the official portal when a question requires an application action rather than merely explaining a rule.

The system should distinguish between domestic admissions, international admissions and distance education. These are different admission channels and should not be mixed.

- Application workflow questions → admissions portal.
- Engineering/SRMJEEE questions → engineering admissions + SRMJEEE documents.
- International questions → international admissions sources.
- Distance education questions → Directorate of Distance Education portal.

Primary sources

Admission portal: <https://admissions.srmist.edu.in/>

6. B.Tech Admission — Core Eligibility

Official SRMIST B.Tech application material states a 10+2/Higher Secondary pathway and specifies subject and aggregate requirements. The 2025 application material should be treated as a prior-cycle source unless the same rule is confirmed for 2026-27.

For RAG, store eligibility as atomic rules: qualifying examination, subjects, minimum aggregate, accepted boards/categories, and any program-specific exceptions.

- Qualifying examination
- Physics/Mathematics subject requirements
- Minimum aggregate
- Program-specific exceptions
- Admission year

Primary sources

B.Tech application: <https://applications.srmist.edu.in/btech>

7. B.Tech Program Discovery

SRMIST's engineering admissions material covers multiple campuses and a broad set of programs and specializations.

CSE-related specializations include areas such as AI/ML, Big Data Analytics, Cloud Computing, Cyber Security, Data Science and IoT in the published material.

The AI should never infer that every specialization is available at every campus. Campus-program relationships must be stored explicitly.

- Campus
- Degree
- Program
- Specialization
- Availability year

Primary sources

B.Tech application: <https://applications.srmist.edu.in/btech>

8. CSE Specializations

For CSE queries, create a specialization catalog. A student asking 'Does SRM have CSE AI?' needs an exact program/campus answer, not a generic statement that AI is a CSE specialization.

Use curriculum documents to distinguish a named degree specialization from an elective track or course cluster.

- Named specialization
- Campus
- Degree title
- Curriculum source
- Admission source

Primary sources

B.Tech application: <https://applications.srmist.edu.in/btech>

9. Counseling and Selection

SRMIST's mandatory disclosure states that programs and approved seats are listed on the website and that eligibility and selection criteria are governed by the applicable admission criteria. The disclosure also notes that aggregate percentage calculations may be carried to three decimal places.

The AI should explain selection as a process, not invent cutoffs unless an official current cutoff is available.

- Eligibility screening
- Entrance/selection mechanism
- Counselling
- Seat allocation
- Fee/enrolment

Primary sources

AICTE admissions warning p166: https://webstor.srmist.edu.in/web_assets/downloads/2025/flipbook/aicte-mandate-disclosure/files/basic-html/page166.html

AICTE admission rules p149: https://webstor.srmist.edu.in/web_assets/downloads/2025/flipbook/aicte-mandate-disclosure/files/basic-html/page149.html

AICTE selection tests p148: https://webstor.srmist.edu.in/web_assets/downloads/2025/flipbook/aicte-mandate-disclosure/files/basic-html/page148.html

10. Counseling — Important Caution

The official 2026 SRMJEEE counselling manual states that students receive a provisional allotment letter after counselling-fee payment and that balance tuition fee payment has a deadline for the relevant round.

Counselling deadlines are highly time-sensitive. Store them with phase/round and year; never answer a current deadline from an old round.

- Phase
- Round
- PAL
- Balance fee deadline
- Enrollment date

Primary sources

B.Tech application: <https://applications.srmist.edu.in/btech>

11. Admission Safety and Official Channels

SRMIST's AICTE mandatory disclosure explicitly warns students and parents not to use unofficial channels for admission and identifies the Directorate of Admissions as the nodal office.

This is useful as an AI safety response: when users ask whether an agent or unofficial payment channel is legitimate, direct them to official SRMIST channels.

- Official channel only
- No cash transactions through unofficial agents
- Verify domain
- Escalate suspicious claims

Primary sources

AICTE admissions warning p166: https://webstor.srmist.edu.in/web_assets/downloads/2025/flipbook/aicte-mandate-disclosure/files/basic-html/page166.html

AICTE admission rules p149: https://webstor.srmist.edu.in/web_assets/downloads/2025/flipbook/aicte-mandate-disclosure/files/basic-html/page149.html

AICTE selection tests p148: https://webstor.srmist.edu.in/web_assets/downloads/2025/flipbook/aicte-mandate-disclosure/files/basic-html/page148.html

12. UG Admission Model

Undergraduate admissions should be represented as a family of program records rather than one generic UG rule. Science & Humanities, Engineering, Law, Medicine and other faculties may use different qualifying criteria and entrance pathways.

A query router should first identify faculty/degree, then retrieve the applicable rule set.

- Faculty
- Degree
- Program
- Entrance
- Eligibility
- Source year

Primary sources

B.Tech application: <https://applications.srmist.edu.in/btech>

13. PG Admission Model

PG admissions vary substantially. The research includes current 2026 curriculum/regulation material and older program-specific regulations. A generic statement such as 'all PG programs require the same exam' would be unsafe.

The knowledge base should attach the exact program and regulation year to each PG eligibility rule.

- Program
- Degree
- Relevant qualification
- Entrance
- Interview
- Regulation year

Primary sources

B.Tech application: <https://applications.srmist.edu.in/btech>

14. Management Admission

The 2025 AICTE disclosure contains management-admission pathways and competitive-exam information, including CAT, MAT, XAT, GMAT, NMAT, CMAT and TANCET thresholds in the cited historical disclosure.

Because this evidence is from the 2025 disclosure, it should be labelled historical/current-cycle-dependent rather than presented as a universal 2026 rule.

- Exam
- Historical minimum
- Program
- Year
- Current verification flag

Primary sources

AICTE admissions warning p166: https://webstor.srmist.edu.in/web_assets/downloads/2025/flipbook/aicte-mandate-disclosure/files/basic-html/page166.html

AICTE admission rules p149: https://webstor.srmist.edu.in/web_assets/downloads/2025/flipbook/aicte-mandate-disclosure/files/basic-html/page149.html

AICTE selection tests p148: https://webstor.srmist.edu.in/web_assets/downloads/2025/flipbook/aicte-mandate-disclosure/files/basic-html/page148.html

15. Medicine and Health Admissions

The AICTE disclosure states that NEET is used for MBBS, BDS, MD, MS, MDS, DM, M.Ch and other relevant medical/dental admissions, with common counselling mechanisms described for specified programs.

The AI should route medical admission questions away from engineering/SRMJEEE rules.

- Program family
- Entrance
- Counselling authority
- Year
- Source

Primary sources

AICTE admissions warning p166: https://webstor.srmist.edu.in/web_assets/downloads/2025/flipbook/aicte-mandate-disclosure/files/basic-html/page166.html

AICTE admission rules p149: https://webstor.srmist.edu.in/web_assets/downloads/2025/flipbook/aicte-mandate-disclosure/files/basic-html/page149.html

AICTE selection tests p148: https://webstor.srmist.edu.in/web_assets/downloads/2025/flipbook/aicte-mandate-disclosure/files/basic-html/page148.html

16. SRMJEEE 2026 — Overview

Official FAQ states that SRMJEEE 2026 has three phases and costs ■1,400 for each phase. The exam is remote-proctored online.

- 3 phases
- ■1,400 per phase
- Remote-proctored online

Primary sources

SRMJEEE FAQ 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/srmjee-2026-faqs.pdf

17. SRMJEEE 2026 — Dates

Official FAQ lists Phase I as 23 Apr–28 Apr 2026, Phase II as 10 Jun–15 Jun 2026 and Phase III as 4 Jul–5 Jul 2026.

- Phase I
- Phase II
- Phase III

Primary sources

SRMJEEE FAQ 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/srmjee-2026-faqs.pdf

18. SRMJEEE — Technical Requirements

The FAQ states that candidates can write the test from home using a desktop or laptop and cannot use a mobile phone. System and internet instructions are communicated before the exam.

- Desktop/laptop
- Internet requirements
- AI monitoring
- Proctors

Primary sources

SRMJEEE FAQ 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/srmjee-2026-faqs.pdf

19. SRMJEEE — Mock Test and Slots

The FAQ states that a mock test is provided before the main exam and that there are two slots per day during exam dates. Slot booking opens close to the exam period.

- Mock test
- Two slots/day
- Slot booking
- Hall ticket

Primary sources

SRMJEEE FAQ 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/srmjee-2026-faqs.pdf

20. SRMJEEE — Examination Pattern

The 2026 pattern document lists 130 questions and 130 total marks over 2.30 hours, with Physics 35, Chemistry 35, Mathematics/Biology 40 and English & Aptitude 20. It states there is no negative marking.

- 130 questions
- 130 marks
- 2.30 hours
- No negative marking

Primary sources

SRMJEEE pattern 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/srmjee-examination-pattern.pdf

21. SRMJEEE — Physics Syllabus

The official syllabus begins with Units and Measurement, Laws of Motion, Work/Energy/Power and then Gravitation and Mechanics of Solids and Fluids. The complete syllabus should be indexed from the official PDF rather than recreated from memory.

- Units
- Mechanics
- Energy
- Gravitation
- Fluids

Primary sources

SRMJEEE syllabus 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/srmjee-syllabus.pdf

22. SRMJEEE — Chemistry Syllabus

The official syllabus PDF should be treated as the authoritative chapter list. Store each unit as a separate chunk and preserve the subject label so a query such as 'SRMJEEE chemistry syllabus' retrieves only chemistry evidence.

- Subject-level metadata
- Unit-level chunks
- Year

Primary sources

SRMJEEE syllabus 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/srmjee-syllabus.pdf

23. SRMJEEE — Mathematics/Biology

The examination pattern allows Mathematics or Biology as the 40-question science/math component. The syllabus PDF is the authoritative source for the unit-level content.

- Mathematics/Biology choice
- 40 questions
- Unit-level retrieval

Primary sources

SRMJEEE pattern 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/srmjeee-examination-pattern.pdf

SRMJEEE syllabus 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/srmjeee-syllabus.pdf

24. SRMJEEE — Counselling

The 2026 Phase I Round II counselling manual describes provisional allotment and balance-fee payment, and directs students studying outside India or belonging to NRI/PIO/OCI categories to international admissions.

- PAL
- Balance fee
- Enrollment
- International routing

Primary sources

SRMJEEE Phase I counselling manual: https://webstor.srmist.edu.in/web_assets/downloads/2026/srmjee-2026-phase-i-round-ii-e-counselling-manual.pdf

25. SRMJEEE — AI Answer Rules

Never answer an SRMJEEE date, fee or deadline without attaching the 2026 phase/round. If the user asks 'when is the exam?', provide all current phases or ask which phase if necessary.

- Year-aware
- Phase-aware
- Round-aware
- Source citation

Primary sources

SRMJEEE FAQ 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/srmjee-2026-faqs.pdf

SRMJEEE Phase I counselling manual: https://webstor.srmist.edu.in/web_assets/downloads/2026/srmjee-2026-phase-i-round-ii-e-counselling-manual.pdf

26. Fee Structure — Data Model

Fees are not one institutional number. They vary by program, campus, degree and academic year. The AI should therefore store fee records as structured data and retrieve exact matches.

- academic_year
- campus
- program
- fee_type
- amount

Primary sources

Admission portal: <https://admissions.srmist.edu.in/>

27. Tuition Fee — Verification Policy

When a current fee PDF/page cannot be verified, the AI should not reuse an older value simply because it is close. It should say that the current fee needs verification and provide the official admissions route.

- Current year
- Source URL
- Program
- Currency

Primary sources

Admission portal: <https://admissions.srmist.edu.in/>

28. Scholarship — General Model

Scholarships should be represented with eligibility, benefit, duration, renewal conditions, exclusions and campus/program scope. A percentage waiver without its conditions is incomplete information.

- Eligibility
- Benefit
- Duration
- Renewal
- Exclusions

Primary sources

International scholarships 2025-26: https://webstor.srmist.edu.in/web_assets/downloads/2025/hand-book-2025-26.pdf

29. International Scholarship 2025-26

The international handbook states that SRMIST offers scholarships for international UG and PG students, with exclusions for specified medical/pharmacy programs. It states that candidates are eligible for either Merit or Economic scholarship, not both.

- International
- UG/PG
- Exclusions
- Merit vs Economic

Primary sources

International scholarships 2025-26: https://webstor.srmist.edu.in/web_assets/downloads/2025/hand-book-2025-26.pdf

30. Founders Scholarship

The 2025-26 international handbook describes a Founders Scholarship for NRI/OCI/PIO candidates, including a 50% tuition-fee waiver for eligible UG candidates meeting the stated academic criteria.

- NRI
- OCI
- PIO
- 50% tuition waiver
- UG

Primary sources

International scholarships 2025-26: https://webstor.srmist.edu.in/web_assets/downloads/2025/hand-book-2025-26.pdf

31. Economic Scholarship

The same handbook describes a 50% economic scholarship for Africa and SAARC applicants on annual tuition fees for UG and PG programs, subject to its stated rules.

- Africa
- SAARC
- 50%
- UG
- PG

Primary sources

International scholarships 2025-26: https://webstor.srmist.edu.in/web_assets/downloads/2025/hand-book-2025-26.pdf

32. Science & Humanities PG Scholarship 2026

The official 2026 scholarship material found during research gives CUET-PG percentile-linked tuition waivers for specified PG programs at Kattankulathur, along with diversity-related waivers and conditions.

- 95+ → 100%
- 90–94.99 → 75%
- 85–89.99 → 50%
- 80–84.99 → 25%

Primary sources

Annual report 2024-25: https://webstor.srmist.edu.in/web_assets/downloads/2026/ugc-annual-report-2024-25.pdf

33. Scholarship Combination Logic

Scholarship rules may contain combination limits. The AI must retrieve the actual policy before telling a student that two benefits can be combined. Store combination rules as explicit boolean/constraint fields.

- Can combine?
- Maximum waiver
- Renewal
- Conditions

Primary sources

International scholarships 2025-26: https://webstor.srmist.edu.in/web_assets/downloads/2025/hand-book-2025-26.pdf

34. Scholarship Answer Template

A good answer should state scholarship name, eligible population, benefit, key criterion, duration/renewal and source year. Avoid saying 'SRM gives X% scholarship' without specifying who qualifies.

- Name
- Who qualifies
- Benefit
- Conditions
- Year

Primary sources

International scholarships 2025-26: https://webstor.srmist.edu.in/web_assets/downloads/2025/hand-book-2025-26.pdf

35. Fees & Scholarship Hallucination Tests

Create automated tests for missing year, missing campus, conflicting scholarship percentages, and old-vs-current fee conflicts. These tests are more important than making the language model sound confident.

- Test current year
- Test campus
- Test conflict
- Test missing source

Primary sources

Annual report 2024-25: https://webstor.srmist.edu.in/web_assets/downloads/2026/ugc-annual-report-2024-25.pdf

36. Hostel 2026-27 — Boys

The official Kattankulathur first-year boys schedule lists room type, hostel fee, mess fee and total fee. Example: N Block AC attached washroom, 2-sharing totals ■2,73,000 (■2,00,000 hostel + ■73,000 mess).

- N Block 2-share: ■273,000
- Green Pearl 3-share: ■270,000
- Adhiyaman 2-share: ■243,000

Primary sources

Hostel boys 2026-27: https://webstor.srmist.edu.in/web_assets/downloads/2026/circular-for-all-first-year-btech-and-mtech-2026-boys.pdf

37. Hostel 2026-27 — More Boys Options

The same schedule lists lower-cost options including non-AC and common-washroom configurations. Total values include both hostel and mess components; optional laundry is separately noted.

- OORI
- KAARI
- JA Block 2
- Optional laundry ■7,500

Primary sources

Hostel boys 2026-27: https://webstor.srmist.edu.in/web_assets/downloads/2026/circular-for-all-first-year-btech-and-mtech-2026-boys.pdf

38. Hostel 2026-27 — Girls

A separate official 2026-27 girls schedule exists for first-year B.Tech and M.Tech (Integrated) students at Kattankulathur. The AI should keep the girls schedule as a separate source because room inventory and pricing can differ.

- First-year
- B.Tech
- M.Tech Integrated
- Kattankulathur

Primary sources

Hostel girls 2026-27: https://webstor.srmist.edu.in/web_assets/downloads/2026/circular-for-all-first-year-btech-and-mtech-2026-girls.pdf

39. Hostel Data Model

Store hostel data with gender/student group, year, campus, room type, sharing, hostel fee, mess fee, total fee, optional services and booking conditions.

- student_group
- campus
- year
- room_type
- sharing
- hostel_fee
- mess_fee
- total

Primary sources

Hostel boys 2026-27: https://webstor.srmist.edu.in/web_assets/downloads/2026/circular-for-all-first-year-btech-and-mtech-2026-boys.pdf

Hostel girls 2026-27: https://webstor.srmist.edu.in/web_assets/downloads/2026/circular-for-all-first-year-btech-and-mtech-2026-girls.pdf

40. Hostel Booking Rules

The 2026-27 hostel circular states that students can book after online verification and generation of the Student Net ID. The AI should distinguish eligibility/booking sequence from fee information.

- Verification
- Student Net ID
- Booking
- Rules

Primary sources

Hostel boys 2026-27: https://webstor.srmist.edu.in/web_assets/downloads/2026/circular-for-all-first-year-btech-and-mtech-2026-boys.pdf

41. International Admissions

The official 2026 international application material covers Foreign, NRI and NRI Sponsored categories and asks for program, branch/specialization, nationality, country of residence and passport details.

- Foreign
- NRI
- NRI Sponsored
- Passport
- Program

Primary sources

International admission 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/admission-international-2026-application.pdf

42. International Routing

Students who studied outside India or belong to NRI/PIO/OCI categories should be routed to international admissions when the applicable official rule says so. The 2026 counselling manual explicitly directs such applicants to international admissions.

- Outside India
- NRI
- PIO
- OCI

Primary sources

SRMJEEE Phase I counselling manual: https://webstor.srmist.edu.in/web_assets/downloads/2026/srmjee-2026-phase-i-round-ii-e-counselling-manual.pdf

43. International Document Model

Create document-type fields for passport, academic records, applicant category and any program-specific requirements. Never infer missing document requirements from another program.

- Applicant category
- Program
- Passport
- Academic records

Primary sources

International admission 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/admission-international-2026-application.pdf

44. Hostel vs Admission Fees

Hostel and mess charges are separate from tuition in the cited hostel documents. The AI must not answer 'total college cost' by adding values unless all components are known and belong to the same year/campus/student type.

- Tuition
- Hostel
- Mess
- Other fees
- Year

Primary sources

Hostel boys 2026-27: https://webstor.srmist.edu.in/web_assets/downloads/2026/circular-for-all-first-year-btech-and-mtech-2026-boys.pdf

45. Accommodation Answer Template

For hostel questions, answer with campus, student group, year, room type, hostel fee, mess fee and total. If a user asks for the cheapest option, compare only options in the same applicable schedule.

- Campus
- Year
- Student group
- Room
- Total

Primary sources

Hostel boys 2026-27: https://webstor.srmist.edu.in/web_assets/downloads/2026/circular-for-all-first-year-btech-and-mtech-2026-boys.pdf

Hostel girls 2026-27: https://webstor.srmist.edu.in/web_assets/downloads/2026/circular-for-all-first-year-btech-and-mtech-2026-girls.pdf

46. Regulations 2026 — Engineering

SRMIST 2026 curriculum PDFs identify a B.Tech/M.Tech (Integrated) Regulations 2026 unified curriculum control copy. This should be treated as a current regulatory source for the applicable programs.

- Regulations 2026
- Volume 1
- Unified curriculum

Primary sources

B.Tech Automation curriculum 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/srmist-btech-automation-and-robotics-curriculum-2026.pdf

47. Multiple Exit Options

The 2026 engineering curriculum documents describe undergraduate/integrated postgraduate programs with multiple exit options and a choice-based flexible credit system.

- Multiple exit
- Flexible credit
- Curriculum

Primary sources

B.Tech Automation curriculum 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/srmist-btech-automation-and-robotics-curriculum-2026.pdf

48. CSE DevSecOps Curriculum

A current 2026 CSE DevSecOps curriculum PDF was located. Program-specific curriculum PDFs are important because a generic CSE curriculum answer may not apply to a named specialization.

- CSE
- DevSecOps
- 2026
- Program-specific

Primary sources

B.Tech DevSecOps curriculum 2026:

https://webstor.srmist.edu.in/web_assets/downloads/2026/srmist-btech-computer-science-and-engineering-devsecops-curriculum-2026.pdf

49. Curriculum Retrieval Strategy

Index curriculum documents at unit/section level. Metadata should include degree, program, specialization, semester, course code and regulation year.

- Course code
- Course title
- Credits
- Semester
- Regulation year

Primary sources

B.Tech DevSecOps curriculum 2026:

https://webstor.srmist.edu.in/web_assets/downloads/2026/srmist-btech-computer-science-and-engineering-devsecops-curriculum-2026.pdf

50. Credit Information

The curriculum documents contain course and credit structures. The AI should quote or summarize only from the applicable program curriculum and should not generalize a credit count across every engineering program.

- Credits
- Course type
- Semester
- Program

Primary sources

B.Tech Automation curriculum 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/srmist-btech-automation-and-robotics-curriculum-2026.pdf

51. Academic Regulations — Historical Versioning

Older regulations remain useful for historical student questions but should be labelled with their year. A current student should receive the current regulation where available.

- Regulation year
- Batch
- Program
- Historical/current

Primary sources

AICTE other admissions p163: https://webstor.srmist.edu.in/web_assets/downloads/2025/flipbook/aicte-mandate-disclosure/files/basic-html/page163.html

52. MPH Regulations 2026

The 2026 MPH curriculum document includes registration, selection and enrolment procedures. It describes a written aptitude test and interview, with special handling for international candidates and government nominees.

- MPH
- Aptitude test
- Interview
- Enrolment

Primary sources

MPH curriculum 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/mph-regulations-curriculum-2026.pdf

53. Academic Rule Conflicts

If an older program regulation says one thing and a newer curriculum says another, the AI must identify the applicable batch/year. Do not merge rules from two versions.

- Batch-aware
- Year-aware
- Source-aware

Primary sources

B.Tech Automation curriculum 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/srmist-btech-automation-and-robotics-curriculum-2026.pdf

54. Transfer of Credits

The AICTE disclosure states that students who attended other universities must provide an official transcript and describes transfer/readmission procedures. Such rules should be treated as institutional policy and verified against current regulations.

- Transcript
- Transfer
- Readmission

Primary sources

AICTE other admissions p163: https://webstor.srmist.edu.in/web_assets/downloads/2025/flipbook/aicte-mandate-disclosure/files/basic-html/page163.html

55. Lateral Entry

The AICTE disclosure states that lateral entry into engineering, architecture and health-science courses depends on seat availability and eligibility. This is a useful policy record, but current program-specific conditions should override the generic statement.

- Lateral entry
- Seat availability
- Eligibility

Primary sources

AICTE other admissions p163: https://webstor.srmist.edu.in/web_assets/downloads/2025/flipbook/aicte-mandate-disclosure/files/basic-html/page163.html

56. Readmission

The disclosure describes formal readmission procedures for former students who were absent or withdrew, requiring approval from relevant heads and compliance with norms.

- Former students
- Application
- Approval
- Norms

Primary sources

AICTE other admissions p163: https://webstor.srmist.edu.in/web_assets/downloads/2025/flipbook/aicte-mandate-disclosure/files/basic-html/page163.html

57. Academic AI Answering

Academic questions should first be routed by degree/program and batch. The model should then retrieve regulation/curriculum evidence and explain the rule in plain language.

- Degree
- Program
- Batch
- Rule

Primary sources

B.Tech Automation curriculum 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/srmist-btech-automation-and-robotics-curriculum-2026.pdf

58. Course Search

For questions such as 'What subjects are in semester 3?', use course-level retrieval rather than a broad document chunk. Store semester and program metadata so retrieval can filter before semantic scoring.

- Semester
- Program
- Course code
- Credits

Primary sources

B.Tech DevSecOps curriculum 2026:

https://webstor.srmist.edu.in/web_assets/downloads/2026/srmist-btech-computer-science-and-engineering-devsecops-curriculum-2026.pdf

59. Curriculum vs Admission

Admission eligibility and academic curriculum are different datasets. Do not answer 'eligibility' from curriculum prerequisites unless the document explicitly defines admission eligibility.

- Admission eligibility
- Course prerequisite
- Regulation

Primary sources

B.Tech Automation curriculum 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/srmist-btech-automation-and-robotics-curriculum-2026.pdf

B.Tech application: <https://applications.srmist.edu.in/btech>

60. Academic Knowledge-Base Design

Maintain a separate regulations collection and a curriculum collection. A policy change can affect rules without changing course content, so independent versioning makes updates safer.

- Regulations collection
- Curriculum collection
- Versioning

Primary sources

B.Tech Automation curriculum 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/srmist-btech-automation-and-robotics-curriculum-2026.pdf

61. Annual Report 2024-25 — Key Context

The 2024-25 annual report reports NAAC A++ accreditation, NIRF 2025 rank 11, 491 patents, 42 startups incubated and scholarships worth ■108.18 crore supporting 7,000+ students.

- Accreditation
- Rank
- Patents
- Startups
- Scholarships

Primary sources

Annual report 2024-25: https://webstor.srmist.edu.in/web_assets/downloads/2026/ugc-annual-report-2024-25.pdf

62. Annual Report — Global Student Context

The annual report says SRMIST had students from 65+ countries and highlights inclusion and global engagement. These are institutional context facts, not admission eligibility rules.

- 65+ countries
- Global engagement
- Inclusion

Primary sources

Annual report 2024-25: https://webstor.srmist.edu.in/web_assets/downloads/2026/ugc-annual-report-2024-25.pdf

63. Engineering NIRF 2026 — Intake

The NIRF 2026 engineering submission lists sanctioned intake for UG four-year programs of 5,730 in 2024-25, 5,520 in 2023-24, 5,040 in 2022-23 and 4,740 in 2021-22. It also lists PG two-year and PG-integrated intake.

- UG 2024-25: 5730
- UG 2023-24: 5520
- UG 2022-23: 5040
- UG 2021-22: 4740

Primary sources

Engineering NIRF 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/flipbook/engineering-nirf-mandatory-srm/files/basic-html/page1.html

64. Engineering NIRF — Student Strength

The NIRF 2026 engineering submission reports 21,180 UG four-year students, 1,355 PG two-year students and 568 PG-integrated students in the displayed actual-strength section.

- UG 21,180
- PG 1,355
- PG-integrated 568

Primary sources

Engineering NIRF 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/flipbook/engineering-nirf-mandatory-srm/files/basic-html/page1.html

65. Engineering NIRF — Placement 2024-25

For UG four-year programs, the NIRF 2026 submission reports 4,408 students graduating in minimum stipulated time and 4,144 placed, with median salary ■632,000 for the displayed 2024-25 outcome cohort.

- Graduated 4,408
- Placed 4,144
- Median ■6.32 lakh

Primary sources

Engineering NIRF 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/flipbook/engineering-nirf-mandatory-srm/files/basic-html/page1.html

66. Engineering NIRF — Placement 2023-24

The same submission reports 4,552 UG graduates in minimum stipulated time and 4,210 placed for the displayed 2023-24 cohort, with median salary ■620,000.

- Graduated 4,552
- Placed 4,210
- Median ■6.20 lakh

Primary sources

Engineering NIRF 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/flipbook/engineering-nirf-mandatory-srm/files/basic-html/page1.html

67. Engineering NIRF — Placement 2022-23

For the displayed 2022-23 UG cohort, the submission reports 4,195 graduates in minimum stipulated time and 4,031 placed, with median salary ■610,000.

- Graduated 4,195
- Placed 4,031
- Median ■6.10 lakh

Primary sources

Engineering NIRF 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/fliipbook/engineering-nirf-mandatory-srm/files/basic-html/page1.html

68. Engineering PG Placement

The NIRF engineering submission reports PG two-year placement outcomes including 2024-25: 621 graduates in minimum stipulated time, 595 placed and median salary ■635,000.

- PG 2024-25
- Graduated 621
- Placed 595
- Median ■6.35 lakh

Primary sources

Engineering NIRF 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/flipbook/engineering-nirf-mandatory-srm/files/basic-html/page1.html

69. Medical NIRF Context

The NIRF 2026 medical submission contains separate intake, student-strength and placement/higher-study information for medical programs. This must be kept separate from engineering data.

- Medical
- UG 5-year
- PG 3-year
- Separate collection

Primary sources

Medical NIRF 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/flipbook/medical-nirf-mandatory-srm/files/basic-html/page1.html

70. Architecture NIRF Context

The NIRF 2026 architecture/planning submission contains separate intake and placement data. Architecture values should not be merged into engineering placement statistics.

- Architecture
- Planning
- UG 5-year
- PG 2-year

Primary sources

AICTE selection tests p148: https://webstor.srmist.edu.in/web_assets/downloads/2025/flipbook/aicte-mandate-disclosure/files/basic-html/page148.html

71. NIRF Data vs Marketing Claims

NIRF median salary and SRM marketing 'highest package' are different metrics. The AI must never substitute one for the other. A median salary describes a cohort distribution; a highest package is a maximum reported package.

- Median
- Highest
- Cohort
- Metric semantics

Primary sources

Engineering NIRF 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/fliipbook/engineering-nirf-mandatory-srm/files/basic-html/page1.html

72. Institutional Statistics Schema

Store NIRF data with ranking year, submitted academic year, faculty/discipline, program duration, intake, graduates, placed count, higher studies and median salary. This prevents accidental mixing of cohorts.

- NIRF year
- Academic year
- Discipline
- Cohort
- Metric

Primary sources

Engineering NIRF 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/flipbook/engineering-nirf-mandatory-srm/files/basic-html/page1.html

Medical NIRF 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/flipbook/medical-nirf-mandatory-srm/files/basic-html/page1.html

73. Placement Knowledge Base — Scope

Add official placement reports, NIRF placement submissions, annual reports and program-specific placement pages. Keep marketing claims and regulatory statistics in separate collections.

- Placement reports
- NIRF
- Annual reports
- Program pages

Primary sources

Engineering NIRF 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/flipbook/engineering-nirf-mandatory-srm/files/basic-html/page1.html

Annual report 2024-25: https://webstor.srmist.edu.in/web_assets/downloads/2026/ugc-annual-report-2024-25.pdf

74. Placement Metrics

Important metrics include offers, students placed, median salary, highest package, average salary and recruiter count. These are not interchangeable. Store metric_name and definition.

- Offers
- Placed
- Median
- Highest
- Average

Primary sources

Engineering NIRF 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/flipbook/engineering-nirf-mandatory-srm/files/basic-html/page1.html

Annual report 2024-25: https://webstor.srmist.edu.in/web_assets/downloads/2026/ugc-annual-report-2024-25.pdf

75. Placement Year Versioning

A query asking 'placement 2025' should first identify whether the user means placement year, graduating cohort, academic year or report publication year. The database should preserve all relevant dates.

- Report year
- Academic year
- Graduation year
- Placement year

Primary sources

Engineering NIRF 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/fliipbook/engineering-nirf-mandatory-srm/files/basic-html/page1.html

76. Department Placement

If program-wise placement data is available, store it separately from institution-wide statistics. Never infer CSE placement from institution-wide engineering placement.

- Program
- Department
- Campus
- Cohort

Primary sources

Engineering NIRF 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/flipbook/engineering-nirf-mandatory-srm/files/basic-html/page1.html

77. Recruiter Data

Recruiter names should be stored as entities linked to a source and year. Avoid claiming that a company recruited in every year simply because it appears in one report.

- Company
- Year
- Program
- Source

Primary sources

Annual report 2024-25: https://webstor.srmist.edu.in/web_assets/downloads/2026/ugc-annual-report-2024-25.pdf

78. Highest Package Handling

Highest package is a maximum and may be a single outlier. The AI should state the year and source when answering it. If the source is a marketing page rather than an audited/regulatory report, label it accordingly.

- Maximum
- Year
- Source type
- Program

Primary sources

Annual report 2024-25: https://webstor.srmist.edu.in/web_assets/downloads/2026/ugc-annual-report-2024-25.pdf

79. Median Salary Handling

NIRF uses median salary of placed graduates for specified cohorts. This should be presented as a cohort statistic and not as the 'average package'.

- Median
- Cohort
- Graduates
- Placed

Primary sources

Engineering NIRF 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/flipbook/engineering-nirf-mandatory-srm/files/basic-html/page1.html

80. Placement Answer Example

Good answer: 'For the 2024-25 engineering UG cohort reported in NIRF 2026, 4,144 students were placed and the median salary was ■6.32 lakh.' Bad answer: 'SRM's average package is ■6.32 lakh.'

- Use exact metric
- Use cohort
- Use source year

Primary sources

Engineering NIRF 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/flipbook/engineering-nirf-mandatory-srm/files/basic-html/page1.html

81. Admissions + Placement Cross-Query

A user may ask 'Which CSE program has better placement?' The system should retrieve program curriculum/admission facts plus available placement evidence, then clearly state when comparable program-level placement data is unavailable.

- Admission
- Program
- Placement
- Comparable cohort

Primary sources

Engineering NIRF 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/flipbook/engineering-nirf-mandatory-srm/files/basic-html/page1.html

B.Tech application: <https://applications.srmist.edu.in/btech>

82. Placement Data Gaps

If a requested metric is not in an official source, do not manufacture it from a different metric. For example, do not turn median salary into average salary or total offers into number of students placed.

- Missing metric
- No substitution
- Explain limitation

Primary sources

Engineering NIRF 2026: https://webstor.srmist.edu.in/web_assets/downloads/2026/fliipbook/engineering-nirf-mandatory-srm/files/basic-html/page1.html

83. Knowledge Base Architecture

Use two layers: structured facts and document chunks. Structured facts should answer exact numerical/date questions; document chunks should support explanation and policy language.

- Structured DB
- Vector index
- Metadata
- Source citations

84. Recommended Metadata

Every chunk should include source_id, document_title, academic_year, publication_year, page, section, campus, faculty, degree, program, topic and freshness status.

- source_id
- year
- page
- campus
- program
- topic

85. Chunking Strategy

Chunk by semantic section rather than only fixed character length. For tables, create a normalized text representation plus the original table chunk. Preserve row/column relationships.

- Semantic chunks
- Table chunks
- Overlap
- Page metadata

86. Hybrid Retrieval

Keep the existing 0.70 semantic + 0.30 keyword approach as an initial configuration, but evaluate it. For exact fees, dates and percentages, keyword/structured retrieval may deserve higher priority.

- Semantic
- Keyword
- Structured lookup
- Evaluation

87. Query Router

Classify questions into admissions, fees, scholarships, SRMJEEE, international, hostel, academics, placements, general SRM or out-of-scope. Then restrict retrieval to the relevant collections.

- Intent
- Collection filter
- Year filter
- Campus filter

88. Numeric Fact Retrieval

For numbers, first search structured facts and exact tokens. Then use the LLM to explain the result. This reduces the chance that Qwen paraphrases or combines unrelated numbers.

- Exact match
- Structured fact
- LLM explanation

89. Source Citation Design

Return source title and page/section whenever possible. The UI can show a 'References' drawer containing the exact chunk and source document.

- Title
- Page
- Chunk
- URL

90. Conflict Resolution

If two official documents conflict, rank by applicability: current year, exact program/campus, explicit policy, then older general document. If conflict remains, tell the user.

- Current
- Specific
- Official
- Explicit
- Conflict

91. Hallucination Guardrails

The model must not invent fees, cutoffs, deadlines, packages or program availability. If evidence is absent, it should say that the current official source was not found.

- No guessing
- No metric substitution
- No year mixing

92. Conversation Memory

Store recent turns for follow-up questions, but never let conversational memory override retrieved evidence. A follow-up such as 'what about the hostel?' should resolve using current hostel data.

- Recent turns
- Evidence priority
- Follow-up intent

93. JSON Record — Admission

Recommended record: {year, faculty, campus, degree, program, specialization, eligibility, selection, entrance, source_url, source_page}. Keep free-text explanation separately from atomic facts.

- Example fields
- Versioning
- Source

94. JSON Record — Fee

Recommended record: {year, campus, program, fee_type, amount, currency, category, source_url, source_page}. Use numeric amount plus formatted display string.

- Exact amount
- Currency
- Scope

95. JSON Record — Scholarship

Recommended record: {year, applicant_type, program_level, scholarship, criterion, benefit_percent, duration, exclusions, combination_rules, source_url}.

- Criterion
- Benefit
- Exclusion

96. JSON Record — Hostel

Recommended record: {year, campus, student_group, hostel, room_type, sharing, hostel_fee, mess_fee, total_fee, optional_charges, source_url}.

- Room
- Sharing
- Fees

97. JSON Record — Placement

Recommended record: {report_year, academic_year, discipline, program_level, cohort, metric, value, unit, definition, source_url, page}.

- Metric
- Cohort
- Definition

98. Evaluation Test Set

Create at least 100 questions spanning admissions, fees, scholarships, SRMJEEE, hostel, academics and placements. Measure retrieval hit@1/hit@3, source accuracy, numeric accuracy and answer faithfulness.

- 100+ questions
- Hit@1
- Hit@3
- Numeric accuracy

99. Deployment Readiness Checklist

Before deployment: verify model files, vector index, structured database, source citations, update process, current-year filters, memory limits, logging and refusal behavior. The Qwen model should run on the server if used.

- Model
- RAG
- DB
- Citations
- Updates

100. Final Research Roadmap

Phase 1: collect official documents. Phase 2: extract/clean. Phase 3: build structured facts. Phase 4: build vector index. Phase 5: hybrid retrieval. Phase 6: Qwen answer generation. Phase 7: evaluation. Phase 8: deploy and schedule source refreshes.

The strongest SRM AI Hub is not the one with the most documents; it is the one that can identify the correct year, program, campus and source before answering.

- Collect
- Structure
- Index
- Retrieve
- Generate
- Evaluate
- Deploy
